

2020 Nevada Breastfeeding Report

Human milk feeding is a proven primary prevention strategy, building a foundation for life-long health and wellness for infants and parents.

Nevada Breastfeeding Rates

See how Nevada breastfeeding rates and other measures compare to national rates and targets set by the Healthy People 2020 (HP2020) initiative.

	Breastfeeding Initiation Rate	Largest Disparity Between Racial/Ethnic Groups
Nevada	80%	20.1%
U.S. National	84.1%	16.7%
HP2020 Target	81.9%	N/A

Source: [National Vital Statistics System birth certificate data](#), a census of all 2019 births and the largest collection of breastfeeding data. Breastfeeding initiation is measured as a percentage. Largest disparity in breastfeeding initiation between racial/ethnic groups is measured as a percentage difference.

	Exclusive Breastfeeding at 6 Months	Any Breastfeeding at 12 Months	Formula Supplementation at 2 Days	mPINC Score
Nevada	21.7%	36%	22.7%	77
U.S. National	25.6%	35.3%	19.2%	79
HP2020 Target	25.5%	34.1%	14.2%	N/A

Source: [CDC Breastfeeding Report Card](#), a biannual publication highlighting progress towards breastfeeding goals in the United States. Breastfeeding and supplementation rates are measured as a percentage. CDC's national Maternity Practices in Infant Nutrition and Care (mPINC) survey assesses maternity care practices that affect how babies are fed.

WIC Program Breastfeeding Performance Measures

The Special Supplemental Nutrition Program for Women, Infants and Children (WIC) program provides supplemental foods, health care referrals, and nutrition education for low-income pregnant, breastfeeding, and non-breastfeeding postpartum women, and to infants and children up to age five. The WIC program serves approximately 53 percent of all infants born in the United States.

	Fully Breastfed Rate	Partially Breastfed Rate	Total Breastfed Rate	Fully Formula Fed Rate
Nevada WIC Rates	13.1%	17%	30.1%	69.9%
National WIC Rates	12.1%	21.9%	33.9%	66.1%

Source: [Fiscal Year 2020 WIC Breastfeeding Data Local Agency Report](#). Breastfeeding and formula feeding rates are measured as a percentage of participating children under one year of age.

Federally Funded Lactation Projects in Nevada During 2020

Each year funding is allocated to a variety of federally funded programs that include infant feeding support through the federal appropriations process.

Centers for Disease Control and Prevention

- The [**CDC Hospitals Promoting Breastfeeding program**](#) provides critical support to advance breastfeeding continuity of care and increase access to lactation-friendly environments in states, hospitals, and communities. In Fiscal Year 2020, this program was funded at \$9 million.
- [**Racial and Ethnic Approaches to Community Health**](#) (REACH) funding is used to reduce health disparities among racial and ethnic populations with the highest burden of chronic disease through culturally tailored interventions to address preventable risk behaviors. As part of the REACH program, the Southern Nevada Health District is working in priority areas for African American and Hispanic Americans to make healthy food more accessible, increase adoption of healthy food resolutions, and increase the number of certified lactation consultants in programs serving priority populations. For community-clinical linkages, they are increasing the number of community health workers supporting referrals to community programs.
- [**Good Health and Wellness in Indian Country**](#) (GHWIC) is the CDC's largest investment to improve American Indian and Alaskan Native (AI/AN) tribal health and is focused on health promotion and chronic disease prevention, including increased breastfeeding rates. In Nevada, the Washoe Tribe of Nevada and California received support through the GHWIC program.

Health Resources & Service Administration, Maternal and Child Health Bureau (HRSA, MCHB)

- The [**Title V Maternal and Child Health \(MCH\) Block Grant**](#) provides funding for states and jurisdictions to meet the unique health needs of their children and families. Nevada has chosen increasing the percentage of infants who are ever breastfed and infants who are breastfed exclusively through 6 months as one of their Title V Maternal and Child Health grant National Performance Measures.

Breastfeeding Coalitions Serving in Nevada

The USBC supports an extensive network of state, tribal, territorial, local, and cultural breastfeeding coalitions working to create policy, systems, and environmental (PSE) interventions to better serve babies and families. The following coalitions serve in Nevada:

- Breastfeeding Taskforce of Nevada: <http://www.nevadabreastfeeding.org>
- Northern Nevada Breastfeeding Coalition: <http://nevadabreastfeeds.org>
