ORGANIZATIONAL MEMBERSHIP BENEFITS

Join the movement to help make breastfeeding easier! As a USBC member, your organization will have a **seat at the table**: helping select the policy priorities emphasized by the USBC and our network each congressional session, informing the capacity-building support provided to the field, and hearing directly from federal partners on their breastfeeding-related projects during the bi-annual virtual membership meetings.

Each member organization gets **access to exclusive tools as well as networking and peer learning opportunities** that help build your organization's capacity to support mothers, lactating people, their babies, and their families. We provide opportunities for visibility through the USBC Event Calendar, which is available for each member organization to add both free and monetized events. This calendar is accessible to everyone via the USBC website and is periodically promoted to thousands of subscribers in the *USBC Weekly Wire* Newsletter.

Membership to the USBC unlocks **exclusive discounts to the annual National Breastfeeding Conference & Convening and other trainings**, and **free access to the First Food Connection Hub**, an exclusive virtual network and collaboration space for first food stakeholders. Member discounts and access to the First Food Connection Hub are accessible to official representatives and any board, staff, or volunteers involved in the organization.

Membership in the USBC also **opens the doorway to involvement in action-focused workgroups, which we call Constellations**. Constellations bring together organizations for collaborative efforts to advance big-picture policy, systems, and environmental changes. By working together, Constellations are able to achieve population-level changes that would not be possible for an organization working alone.
